

# SEC Renewable Energy Park Horsham

## Community information session Thursday 5 December

The SEC is delivering a 100% publicly owned renewable energy project right here in Horsham.

The SEC Renewable Energy Park is an integrated solar and battery project to be built in two stages.

The SEC would like to work with the Horsham community throughout the development process, starting with hearing your views on our construction timeline and discussing how the project can deliver significant benefits to the local region.

We're holding community drop-in sessions to talk about:

- construction process and timeline
- local suppliers, jobs and apprenticeships
- community benefits sharing – including \$42,000 per year during construction and \$70,000 per year once operational.

**Horsham Town Hall**  
**Thursday 5 December**  
**Drop in between 11am – 3.30pm or 5 – 7.30pm**

If you have questions but can't attend a session:  
Call 1300 305 700
